EDUCATION

B.S. Computer Science, San Francisco State University — Expected May 2028 | GPA: 3.5

Dean's Honor List (CCSF) | Coursework: Data Structures & Algorithms, Object-Oriented Programming, Computer Architecture, Linear Algebra

SUMMARY

Computer Science student with experience in technical documentation, security-focused development, and cross-functional collaboration seeking a Technical Program Management internship.

SKILLS

Technical: TypeScript, JavaScript, Python, Java, C, Flask, Firebase, Next.js, Nest.js, REST APIs, Git/GitHub, Linux

Collaboration: Technical Documentation, Stakeholder Communication, Project Coordination, Agile Collaboration, Team Leadership

PROFESSIONAL EXPERIENCE

Open Source Contributor / Micro-Internship | [Keyshade.io](https://keyshade.io) & [CodeDay](https://cruzbuilt.codes) | Jan 2026 – Present

- Created technical documentation and communicated security implementation details while collaborating in an open-source environment.
- Implemented type-safe validation and input sanitization using TypeScript and Zod to help mitigate XSS vulnerabilities.
- Managed contributions to an [active pull request](#) within a professional Nest.js/Next.js codebase serving 700+ developers.

Teacher's Assistant | **City College of San Francisco** | Aug 2025 – Dec 2025

- Supported coursework communication, grading coordination, and academic assistance for classes of up to 100 students.
- Assisted with assignment feedback and coursework organization within a collaborative instructional environment.

PROJECTS

[GreenSense](#) | Feb 2026 – Present

- Directed a multi-disciplinary development team by defining milestones and coordinating frontend/backend integration efforts.
- Designed a Flask and React telemetry pipeline supporting real-time HVAC optimization monitoring.

[Dogs2Home](#) | Mar 2026 – Present

- Coordinated development of a proof-of-concept monitoring platform integrating hardware triggers with Google Cloud and Firebase.
- Developed backend communication systems supporting real-time synchronization and scalability.

LEADERSHIP & INVOLVEMENT

Outreach Chair | **SF Hacks** | Mar 2026 – Present

- Leading sponsor outreach and partnership coordination efforts with corporations, campus organizations, and industry representatives supporting SF Hacks initiatives.
- Coordinating cross-functional planning and communication across outreach and event teams for hackathon events historically serving 200–300+ hackers and volunteers.
- Supporting community engagement initiatives aimed at sustaining participation within a growing Bay Area student technology community.

Quality Assurance Volunteer Tester | **Madhouse Productions** | Aug 2025 – Feb 2026

- Tested gameplay updates and documented bugs for an indie Roblox studio supporting a 4,000+ member community.
- Collaborated with developers through Discord to communicate testing feedback during development cycles.
